About Us

METAL & PLASTIC PRIVATE LIMITED is one of the best leading manufacturer in Screwdrivers & Hand Tools business based at Ludhiana.

METAL & PLASTIC PRIVATE LIMITED is a globally recognized manufacturer of high quality hand tools, proudly serving both domestic and international markets under the renowned brand name **"FOCUS."** Originally known as India's leading manufacturer of premium **screwdrivers** made from high grade steel and cellulose acetate plastic handles, the company has since evolved to offer a comprehensive range of professional tools, including **pliers, wrenches, cutters, hammers**, and more, to meet the dynamic needs of users across industries.

Driven by cutting-edge technology and a deep understanding of professional requirements, every tool we create is engineered to deliver unmatched performance, durability, and design. Whether you're managing everyday tasks or engaging in advanced technical work, our products are designed to empower your efforts with confidence and precision.

Legacy of Leadership

Established in 1965 by **Late Shri Lahori Ram Sehgal Ji**, the company was built on a vision of excellence and a deep commitment to craftsmanship. This foundation was strengthened by **Shri B.S. Sehgal Ji**, whose foresighted leadership helped shape the business into a trusted name across generations. Today, this legacy continues under the leadership of his son, **Mr. Anoop Sehgal**, the current Managing Director, who brings modern strategies and a global perspective while preserving the brand's enduring values.

Quality You Can Trust

We are proud to be an **ISO 9001-certified company**, accredited by **Intertek, UK**, underscoring our adherence to global quality standards. Our production processes are rigorously monitored and continuously improved to ensure that every tool delivers unmatched performance and durability.

Nationwide Presence, Global Reach

With a robust network of over 600 Authorized Dealers spread across India and a solid **Export** portfolio, we have established our footprint in both the national and international markets. We are also proud suppliers to leading OEMs including **Tata Steel Limited, KEI Industries Limited, Fine Switchgears, Ketco, VR CABLES, VINAY ELECTRICAL, Polycab, Polymak**, among many others, reinforcing our reputation as a trusted partner across industries.

Innovation & Expansion

At **Metal & Plastic Pvt. Ltd.**, innovation is not just a value, it's our way forward. Our dedicated R&D team constantly works to introduce new products tailored to the evolving needs of professionals. We are committed to expanding our product range day by day, ensuring that our customers always have access to the latest and most reliable hand tools.

Our Promise

This catalogue is more than a product showcase, it is a reflection of our promise to deliver quality, reliability, and performance in every tool we make. We take pride in building **long term relationships** with our customers, based on mutual trust and consistent value.

We are deeply grateful for the continued **support and cooperation of our valued customers**, whose confidence inspires us to reach new heights every day.

"Crafted with precision. Backed by trust. Powered by legacy. At **"FOCUS"**, we don't just make tools, we build confidence in every grip."

Director's Message

Dear all,

Your trust drives our commitment to quality and innovation every day.

Together, we build stronger tools, stronger businesses, and stronger partnerships.

Warm regards,

M.D.

SCREW DRIVERS - SLOTTED HEAD ENGINEER'S PATTERN

Cellulose Acetate Plastic Handle

Blades are made of high grade steel, full hardened with black tip for long life. Non-flammable, shockproof and chemical-resistant.

Customized Designs

We offer wide variety of ergonomically designed screw driver handles & blades tips. Some of the customized designs are indicated below for ready reference.

Handles

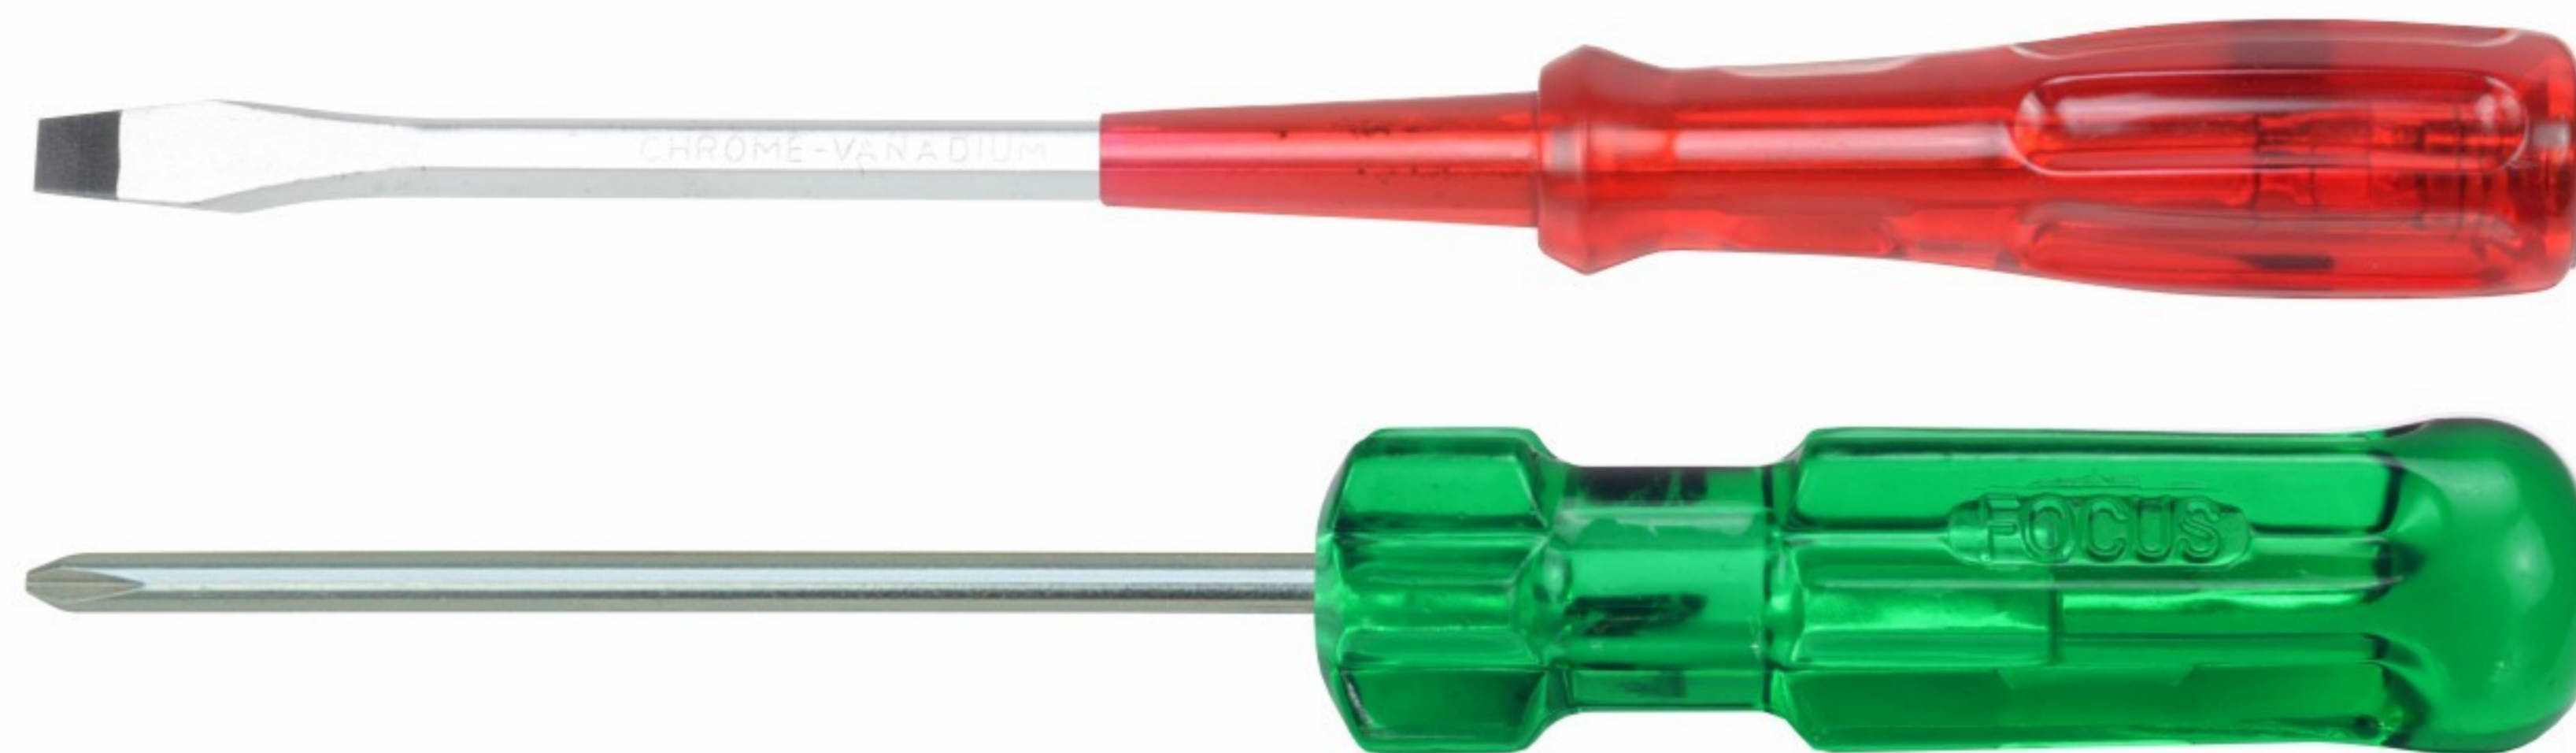

Blades

Blade Tips

- To minimize risk of injury, always wear eye protection.
- When using a screwdriver, always position the tip directly over the fastener to completely engage the tip before turning. A misaligned screwdriver will definitely damage the fastener and over time, will eventually cause excessive wear and tip failure.
- Use the correct size tip for the size of screw head. This will help prevent the tool from slipping. If the tip is too big it may damage or mark the work piece. If the tip is too small it may damage the fastener and in most cases, one will damage both and possibly harm oneself.
- Try not to use a screwdriver with rounded or worn edges or tips. The screwdriver will not fit the fastener properly, will slip out of the fastener, and will cause damage to the fastener or the work piece or user and possibly all of the above.
- If you need extra leverage to loosen or tighten a stubborn fastener, use the proper tool. Never use locking or slip-joint pliers on the handle of a screwdriver to get extra turning power. This may help you turn that stubborn fastener now, but will mark and gouge the handle and make it uncomfortable to use in the future. There are screwdrivers specifically designed for that purpose, either with a square or hex shank or a drive in the butt of the handle.
- Always use each type of screwdriver for its intended use. Never use a screwdriver as a pry bar, chisel, punch, scraper or alignment tool. You will most likely ruin the tool, cause damage to your work and possibly risk injuring yourself.
- The most common misuse is using your slotted screwdriver to open a paint can and then stir the paint. Neither is a good idea. Opening that paint can may bend the tip slightly enough that it won't fit in a fastener or break it completely. Using it to stir that paint will leave a residue build-up that may cause the tip to be too big to fit the fastener.
- Unless absolutely necessary, never hold the work piece in one hand while using the screwdriver with the other. When, not if, the screwdriver slips out of the fastener, the tip of that screwdriver will find its way into your other hand and you will possibly injuring yourself.
- Never grind or subject the tip to heat. Heat can affect the temper of the metal and weaken the tool. Never use a screwdriver near live electricity. The blade is metal and conducts electricity and not all handles will insulate you from the current.
- Never carry a screwdriver in your back pocket.
